

WHAT IS CLAIMED IS:

1. An audio visual system comprising a housing having a front wall, a video display, at least one speaker support coupled to said housing, and at least one speaker mounted to and supported by said speaker support, said speaker having a front and a rear wall, and said speaker support being movable with said speaker mounted thereto from a first state, where said front of said speaker is behind a portion of said housing so that said front is hidden from view when viewing said front wall of said housing, to a second state, where said speaker is spaced from said housing and said front of said speaker is unobstructed thereby.
2. The audio visual system of claim 1 wherein said video display comprises a television.
3. The audio visual system of claim 1 wherein said video display comprises a flat panel video display.
4. The audio visual system of claim 1 wherein said video display comprises a flat panel monitor.
5. The audio visual system of claim 1 further including a drive coupled to said mount for moving said speaker support and speaker therewith.
6. The audio visual system of claim 1 further including a screen extending from said housing to said speaker.
7. The audio visual system of claim 6 wherein said speaker has a first and second side wall, said screen extending from said housing to said first wall.
8. The audio visual system of claim 6 wherein said speaker has a first and second side wall, said screen extending from said housing to said second wall and covering said front of said speaker.
9. The audio visual system of claim 1 wherein said at least one speaker is mounted to a single support.

10. The audio visual system of claim 1 wherein said at least one speaker is suspended from said support.
11. An audio visual system comprising a housing having a front wall, a video display, at least one speaker support coupled to said housing, and at least one speaker suspended from said speaker support, said speaker having a front and a rear wall, and said speaker support being movable with said speaker suspended therefrom, said speaker support comprising an extensible member.
12. The audio visual system of claim 11 wherein said at least one speaker is suspended from a single support.
13. The audio visual system of claim 11 wherein said video display comprises a television.
14. The audio visual system of claim 11 wherein said video display comprises a flat panel video display.
15. The audio visual system of claim 11 wherein said video display comprises a flat panel monitor.
16. The audio visual system of claim 11 further including a drive coupled to said mount for moving said speaker support and speaker therewith.
17. The audio visual system of claim 11 further including a screen extending from said housing to said speaker.
18. The audio visual system of claim 17 wherein said speaker has a first and second side wall, said screen extending from said housing to said first wall.
19. The audio visual system of claim 17 wherein said speaker has a first and second side wall, said screen extending from said housing to said second wall and covering said front of said speaker.
20. An audio visual system comprising a housing having a front wall, a video display, at least one speaker box support coupled to said housing, and at least one speaker box forming a space adapted to receive another speaker box, said at least

one speaker box being mounted to and supported by said speaker support, said at least one speaker box having a front and a rear wall, and said speaker support being movable with said speaker box mounted thereto from a first state, where said front of said at least one speaker box is behind a portion of said housing so that said front is hidden from view when viewing said front wall of said housing, to a second state, where said at least one speaker box is spaced from said housing and said front of said at least one speaker box is unobstructed thereby.

21. The audio visual system of claim 20 wherein said at least one speaker box is without a speaker.

22. The audio visual system of claim 20 wherein said video display comprises a television.

23. The audio visual system of claim 20 wherein said video display comprises a flat panel video display.

24. The audio visual system of claim 20 wherein said video display comprises a flat panel monitor.

25. The audio visual system of claim 20 further including a drive coupled to said mount for moving said speaker box support and speaker box therewith.

26. The audio visual system of claim 20 further including a screen extending from said housing to said speaker box.

27. The audio visual system of claim 26 wherein said speaker box has a first and second side wall, said screen extending from said housing to said first wall.

28. The audio visual system of claim 26 wherein said speaker box has a first and second side wall, said screen extending from said housing to said second wall and covering said front of said speaker box.

29. The audio visual system of claim 20 wherein said at least one speaker box is mounted to a single support.

30. The audio visual system of claim 20 wherein said at least one speaker box is suspended from said support support.

31. An audio visual system comprising a housing having a front wall, a video display, at least one speaker box support coupled to said housing, and at least one speaker box suspended from said speaker box support, said speaker box forming a space adapted to receive another speaker box and having a front and a rear wall, and said at least one speaker support being movable with said speaker box suspended therefrom, said at least one speaker box support comprising an extensible member.

32. The audio visual system of claim 31 wherein said at least one speaker box is without a speaker.

33. The audio visual system of claim 31 wherein said at least one speaker box is suspended from a single support.

34. The audio visual system of claim 31 wherein said video display comprises a television.

35. The audio visual system of claim 31 wherein said video display comprises a flat panel video display.

36. The audio visual system of claim 31 wherein said video display comprises a flat panel monitor.

37. The audio visual system of claim 31 further including a drive coupled to said mount for moving said speaker box support and speaker therewith.

38. The audio visual system of claim 31 further including a screen extending from said housing to said speaker box.

39. The audio visual system of claim 38 wherein said speaker box has a first and second side wall, said screen extending from said housing to said first wall.

40. The audio visual system of claim 38 wherein said speaker box has a first and second side wall, said screen extending from said housing to said second wall and covering said front of said speaker box.
41. An audio visual system comprising:  
a first unit comprising a housing having a front wall, first and second side portions, and a video display; and  
a second unit adapted to be positioned adjacent to one of said side portions and comprising a speaker cabinet having a front wall, a speaker support coupled to said speaker cabinet, at least one speaker mounted to and supported by said speaker support, said speaker having a front and a rear wall, and said speaker support being movable with said speaker mounted thereto from a first state, where said front of said speaker is behind a portion of said speaker cabinet front wall so that said speaker front is hidden from view when viewing said front wall of said speaker cabinet, to a second state, where said speaker is spaced from said speaker cabinet and said front of said speaker is unobstructed thereby.
42. The audio visual system of claim 41 wherein said video display comprises a television.
43. The audio visual system of claim 41 wherein said video display comprises a flat panel video display.
44. The audio visual system of claim 41 wherein said video display comprises a flat panel monitor.
45. The audio visual system of claim 41 further including a screen extending from said housing to said speaker.
46. The audio visual system of claim 45 wherein said speaker has a first and second side wall, said screen extending from said housing to said first wall.
47. The audio visual system of claim 45 wherein said speaker has a first and second side wall, said screen extending from said housing to said second wall and covering said front of said speaker.

48. The audio visual system of claim 41 wherein said at least one speaker is mounted to a single support.

49. The audio visual system of claim 41 wherein said at least one speaker is suspended from said support.

50. The audio visual system of claim 41 further including a third unit adapted to be positioned along the other of said side portions and comprising a speaker cabinet having a front wall, a speaker support coupled to said third unit speaker cabinet, at least one speaker mounted to and supported by said third unit speaker support, said third unit speaker having a front and a rear wall, and said third unit speaker support being movable with said third unit speaker mounted thereto from a first state, where said front of said third unit speaker is behind a portion of said third unit speaker cabinet front wall so that said third unit speaker front is hidden from view when viewing said front wall of said third unit speaker cabinet, to a second state, where said third unit speaker is spaced from said third unit speaker cabinet and said front of said third unit speaker is unobstructed thereby.

51. A speaker system comprising a speaker cabinet having a front wall, a speaker support coupled to said speaker cabinet, at least one speaker mounted to and supported by said speaker support, said speaker having a front and a rear wall, and said speaker support being movable with said speaker mounted thereto from a first state, where said front of said speaker is behind a portion of said speaker cabinet front wall so that said speaker front is hidden from view when viewing said front wall of said speaker cabinet, to a second state, where said speaker is spaced from said speaker cabinet and said front of said speaker is unobstructed thereby.

52. The audio visual system of claim 51 further including a screen extending from said housing to said speaker.

53. The audio visual system of claim 51 wherein said speaker has a first and second side wall, said screen extending from said housing to said first wall.

54. The audio visual system of claim 51 wherein said speaker has a first and second side wall, said screen extending from said housing to said second wall and covering said front of said speaker.

55. The audio visual system of claim 51 wherein said at least one speaker is mounted to a single support.

56. The audio visual system of claim 51 wherein said at least one speaker is suspended from said support.
